

BOOM Cards (Digital Task Cards): Water Cycle FREEBIE

Help your students learn about the water cycle with this fun set of 12 interactive BOOM Cards. They are part of the new Boom Learning platform. Students just need an iPad or computer and they can complete these task cards online. You can even use Boom Cards through your interactive whiteboard! These cards are self-checking and no prep- that means no printing, cutting or laminating! Boom Cards offer an easy way for teachers to assess this important skill. Ignite your kid's interest with this engaging new technology.

Contains: 12 BOOM Cards

What is a BOOM CARD?

Boom Cards play on modern browsers (released in the last three years) on any modern browsers on interactive whiteboards, desktops, laptops, netbooks, Chromebooks, iPads, iPhones, Android tablets and phones, and Kindle-Fire tablets. Boom Cards apps are on The App Store, Google Play, and the Amazon Kindle Fire store. To redeem your Boom Cards, you will create an account for Boom Learning. The account you get with your purchase allows you to play the Boom Cards on interactive whiteboards and with individual students using Fast Play. Fast Play does not save student progress reports. Boom Learning will give customers who are new to Boom Cards, for one year, and at no charge, the ability to collect and maintain student progress reports for up to 80 students. To collect and maintain student progress reports, you must assign students individual usernames and passwords. At the end of that year, you may renew or choose not to renew. If you do not renew, you will be able to continue using Boom Cards with the Fast Play feature. Fast Play does not track individual progress."
